About

psRadar Direct | A Plex, Sonarr and HW monitor

Monitors Plex.tv and Sonarr.tv services via their local API.
It also acts as a hardware monitor, including GPU statistics.

Only a few megabytes in an isolated application folder.
No bloat (shared files, services or third-party software).
A local URL is specified in the Guide page of the program.

DISCLAIMER

This software IS NOT affiliated with Plex.tv or Sonarr.tv in ANY WAY.
This software DOES NOT PROVIDE STREAMING, PLAYING OR DOWNLOADING OF MEDIA.
This software is strictly a service-monitoring tool for Plex/Sonarr server managers.
Users of this software are fully responsible for their own server(s) and their content.

Changelog

2020.03.11 Update

[✖]Improvement: GPU load will now detect and show the highest value between GPU Core and GPU Video Engine.
OHM library updated.

2019.08.06 Windows Release 1.0.13

[✖]Bugfix: Fixed a localization datetime database bug.

2019.05.03 Windows Release 1.0.12

[✖]Bugfix: Big optimizations to CPU load. A few bug fixes.

2019.04.13 Windows Release 1.0.11

[✖]Bugfix: Modifications to the startup system, no longer registry based but a scheduled task for elevation reasons.

2019.02.16 Windows Release 1.0.10

[✖]Misc: Added support for SSL. In this version you also need to copy user.config in appdata from local\Thronic.com to local\Dag_J_Nedrelid to regain config, or just fill and save hosts, ports and pin again. DB is not touched.

2018.07.26 Windows Release 1.0.8

[✖]Hardware statistics: Moved from OHM to latest LHM DLL for better Ryzen support.

2018.07.08 Windows Release 1.0.7

[✖]UI++: A server-side buffer has been created as a major boost to the graph. Server maintains history data up to 4K resolution browser widths (5 sets of 3840 points of data).

2018.07.05 Windows Release 1.0.5

[✖]UI: Third party JavaScript libraries (vis.js and justgage) removed due to performance and instability issues. A custom library Graf.js has been created specifically for psRadar from scratch, and is also freely available for any other recreational use.

2018.06.27 Windows Release 1.0.4

[✖]Bugfix: Browser could freeze over time. This should now be fixed with graph library updates.

[✖]Bugfix: Improved transcoding type detection and reporting.

2018.06.05 Windows Release 1.0.3

[✖] Bugfix: HW transcoding could cause a handled exception, failing to report activity. This has been fixed.

2018.05.16 Windows Release 1.0.2

[✖] Bugfix: Clients with empty titles (e.g. PS4) now falls back on product and profile, respectively. N/A as a last resort.

2018.03.24 Windows Release 1.0.1

[✖] Bugfix: Top user activity would show 20 instead of 10.

[✖] UI change: Very long titles truncated to 25, floating UI layers will no longer be pushed down by a long title.

2018.03.16 Initial Release Windows 1.0.0 and Android app 2.2

[✖] Moving away from the online psRadar service, psRadar Direct is a 100% self-hosted and standalone software with new and improved core functionality based on the agent and app for the online version. Continued development will be focused on this Direct version (as in direct-to-your-server, not online-hosted). It also replaces the older Plex Activity Logger.

[psRadarDirectSetup.exe](#)

The installer executable for Windows.

[psRadarDirect.apk](#)

The installer package for Android.

Android app is also available via [Google Play](#).

Big thanks and improvement credits to Nightwaker for extensive testing!
